Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).

-!-FUNCTION: Mediates caspase-dependent apoptosis.

-!- SUBUNIT: Homodimer. Blands BAX, BCL2 and BCLX (By similarity).

-!- DOMAIN: The BH3-like domain is required for association with BAX and for mediating apoptosis. The three BH domains (BH1, BH2, and BH3) of BAX are all required for mediating protein-protein interaction (By similarity).

-!- SIMILARITY: Belongs to the PNMA family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             18;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     29.3%; Score 711; DB 1; Length 352; 42.2%; Pred. Science 286.1571.1577(1999).
-!- FUNCTION: This protein is essential for replication of the chromosome. It is also involved in DNA recombination and repair chromosome. It is also involved in DNA recombination and repair (By similarity).
-!- SUBUNIT: Homodimer (By similarity).
-!- SIMILARITY: Contains 2 SSB domains.
-!- CAUTION: Ref. 3 sequence differs from that shown due to two frameshifts in positions 93 and 169.
                                                                                                                                                                                                                                                                              -RSAEKWSSGRS-GRKRNASVERRSAASSSRRSR-----SGGRRRKSCFGAS 547

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
